

Olympus Lock: Institutional grade cabinet locks

Olympus Lock revolutionized the industry upon their founding in 1985 by filling a need for the invention of rekeyable pin tumbler cabinet locks.

The company offers a wide selection of cabinet lock types, sizes, and finishes, including door and drawer deadbolt locks, cam locks, sliding door locks, latch locks, and locks for specialty applications. Their catalog includes many choices of rekeyable pin-tumbler, interchangeable core, and engineered cabinet lock bodies for manufacturer's and 3rd party cylinders.

The preferred choice of institutional locksmiths: durable and easy to install, use, and service.
